Year 3 Star Challenge – Autumn Term – Return by Monday 18th December 2023

In Science we are learning about skeletons. For your star challenge we would like you to choose an animal and research into its skeleton. You could present labelled diagrams, make a model of your animal skeleton, or write about the different parts of the skeleton. You might even want to research into animals that don't have skeletons.

Success criteria	1 star	2 stars	3 stars
To show understanding of the structure of the skeleton	I have identified different bones within the skeleton.	I have explained the purpose of bones in the skeleton.	I have compared my animal's skeleton with a human skeleton and talked about the similarities and differences.
To present my information clearly	I have used one method of presentation (eg text or diagram)	I have used more than one method of presentation (eg photos and text).	I have used more than one method of presentation and taken pride in the quality of my work.
To explain my information clearly to the class	I used a clear voice when talking about my project.	I was able to explain how I had researched into my project.	I was able to give additional information when answering questions.
