

Year 3 Star Challenge – Spring Term – Return by Monday 23rd March 2026

Your mission: to show that you are a **WORLD EXPERT!**

In *Geography* this term we are learning about *Our World*. For this term's star challenge, please could your child create a representation of the world. This could be a model, a map, a presentation, a poster or a story. They might like to include lines of longitude/latitude; the Equator; the Tropics and the Northern and Southern Hemisphere. They might also like to include oceans, continents and countries (building on learning from the autumn term).

Success criteria

The Big Map: I have included the **7 continents** and **5 oceans** in the right places. I have also marked the **Equator** running through the middle.

The Builder's Eye: I have used colours and materials that make sense (like blue for water or green for land) and my project is neat and well presented.

The Codebreaker: I have included a **key (Legend)** that explains what my colours and symbols mean so others can understand my work.
